Healthcare Human Resources: What Physicians, Nurses, and Healthcare Providers Need to Make Their Jobs Easier and Manage Burnout, Technology, the Administrative Burden of Health, and the Impact on Human Resources

May 27 | 8:00 AM – 9:30 AM
Kitsilano Ballroom - Level 4

In this session, Dr. Kathleen Ross will share innovative strategies to manage workloads more effectively and discuss insights on addressing and mitigating burnout and its impact on overall healthcare delivery. The session will also explore utilizing innovative technology to streamline healthcare processes and enhance the efficiency of medical professionals proposing solutions to alleviate its impact on physicians, nurses, and human resources.

Working Together to Advance Canada's Shared Health Priorities Through Data and Digital Health

May 27 | 4:15 PM – 5:30 PM
Kitsilano Ballroom - Level 4

Join us for a dynamic conversation featuring leaders from Digital Health Canada, Canada Health Infoway and the Canadian Institute for Health Information as they discuss the pivotal role of collaboration and innovation in advancing our national shared health priorities. Situated within the framework of the February 7, 2023 announcement from the Federal government on "Working together to improve health care for Canadians," this session will explore the data and digital health imperatives that underpin the recently developed shared health priorities in four key areas: primary care health services, health system capacity and supply, mental health and substance use, and a modernized health system.

Panellists will discuss the contribution of our collective efforts towards setting, measuring and acting on identified gaps to advance outcomes for the priority focus areas. Central to this discussion is the critical role health data, technology, and interoperability play in modernizing our health system to meet the evolving needs of Canadians. Through real-world examples and insights, our speakers will highlight the importance of aligning investments with a robust measurement strategy and illustrate how shared vision, collaboration, and better information for governments and Canadians can drive progress in addressing existing challenges within Canada's healthcare system.

CLOSING KEYNOTE

A Parent's Perspective on Advocacy in Healthcare for People with Disabilities

May 28 | 3:45 PM – 5:00 PM
Kitsilano Ballroom - Level 4

Closing keynote speaker Tamara Taggart learned how to be an advocate out of necessity. When her son Beckett was born with Down syndrome, healthcare providers were negative and dismissive of his potential. When her son was three years old, Tamara received life-saving surgery and a rare cancer diagnosis and the response from physicians was positive and encouraging - a stark contrast to what she heard when her beautiful baby boy was born.

Words, tone and basic kindness play a huge role in healthcare, especially when it comes to conquering the discrimination of disabled people in healthcare. Tamara will share her journey to healthcare advocacy and why we must all become advocates for positive change.

Tamara Taggart is a mother of three, podcast host of TELUS Talks with Tamara Taggart, and the volunteer President of Down Syndrome BC.
